Information

Note: Senstar does not support connecting the Senstar Symphony Client 8.x to the Senstar Symphony Server 7.x and cannot guarantee that all functionality will work as expected.

Note: After upgrading the Senstar Symphony Server, you should refresh any Senstar Symphony web pages to update any cached content and to make sure that those web pages function properly after the upgrade.

Release 8.10.1 (August 2025)

This release includes fixes from previous releases.

Fixes

Description
Fixed a permission bug, users with Export Video set to Deny/Not Set can no longer export video.

Release 8.10.0 (August 2025)

This release includes new features, enhancements, fixes, and other changes from previous private releases.

New features

Summary	Description
Export Video timestamp toggle	Allows admins lock the Date + Time checkbox during export.
Retention time export report	Adds a report to export storage retention by camera or site.
LenelS2 Integration	Receive events and send commands to LenelS2.
HTTP request action AMAG	Allows rules to call HTTP endpoints (for webhooks/APIs).
Login attempt limits	Adds UI to set maximum login attempts and lockout duration.
Password history policy	Adds a policy to prevent reusing recent passwords.
Password complexity policy	Admins can configure password complexity requirements.
Security settings: lockout UI	Adds lockout configuration controls to Security Settings.
Security settings validation	Warns when mandatory Security Settings fields are left empty.
Security settings permission	Adds a permission to restrict access to Security Settings.
Alarm processing default	Allows changing the default advanced alarm type.
System error log	Creates a dedicated log file for system errors.
Mute audio toggle	Adds a mute/unmute control for alarm audio.
Map keyboard navigation	Adds keyboard functionality for zoom, scroll, and pan on maps.
Log file archiving	Adds automatic archiving of older log files.
AMAG integration component	Bundles the AMAG DLL with the product installation.
Network Manager Mate event notification	Event for NMS Mate Offline/Online available

Enhancements

Summary	Description
Client graphics compatibility mode	Adds option to disable WPF hardware acceleration for better stability on older hardware.
RTSP keyframe playback	Supports keyframe-only playback for smoother high-speed scrubbing.

Summary	Description
CSV delimiter setting	Adminastrator cand select the delimiter for CSV exports.
Overlay command sorting	Enables sorting of overlay camera command lists.
Timeline scrubbing timeout	Makes scrubbing timeout configurable; applies only to same-camera navigation.
Mobile Bridge hardening	Removes version information disclosure on Mobile Bridge port.
Unlicensed integration visibility	Shows unlicensed status even when the integration is selected.
Cleaner retention alignment	Cleans timeline and decoration files according to each camera's retention period.
Per-camera metadata retention	Allows metadata storage duration to be set per camera.
CSV export: metadata retention field	Includes metadata retention in camera CSV export data.
Security permission updates	Updates server and web client to recommended security permissions.
Bulk permissions: naming fix	Fixes duplicate permission names in bulk actions.
Bulk permissions: selection fix	Improves Select All to exclude unrelated parent groups.
Map rendering performance	Improves responsiveness and smoothness of map rendering.
LPR component upgrade	Updates installer to use Carmen ANPR 7.3.1.29 instead of Carmen Gx 7.3.1.13.
Scheduled alarm time format fix	Ensures consistent time format when configuring scheduled alarms.
Device event performance	Reduces client load for updating device events.
Chinese translation for Alarm Console	Enables advanced mode alarm console columns to be translated into any language.
Animal detection refinement	Uses perspective data to ignore small objects and improve animal detection accuracy.
Fisheye quad view correction	Fixes issue where all panels in quad view displayed the same image.
Lenel historic alarm support	Adds ability to display historic alarms in Lenel integration.
Early video access	Allows viewing video before the available days list is fully loaded.
Device tree status filter link	Hiding status now also disables filtering by status.
Clickable alarm severity	Makes alarm severity fields interactive for quick filtering or navigation.

Fixes

Description
Investigate: Symphony Client shows error 'Failed to initialize media library' when starting client after upgrading
Onvif Profile M: Axis Object Analytics decorations are not shown anymore
Videowall.exe SDK sample is not working - System.NullReferenceException
video_settings are overwritten when recording mode is changed by batch file
Setup Wizard takes a long time to launch if it's pointing to the DB via an IP and the machine's IP changes
Adding carousels adds other carousels from the first server in server list to the multiview
Issue in Symphony Client's Backward compatibility with 8.8.4 server , does not show network manager nodes.
Timeline will disappear automatically after add carousel in multiview
Camera Callup feature doesn't work if you use a MAP in the Action
Symphony fails to play video while using the search Window
Integrations - Deallocating permits can deadlock
Symphony: Video is not displayed from a streaming camera and also loop files on it.
Consolidated Timeline - Signal partially disappears when scrolling in on the timeline (scroll out is fine)
Masking doesn't work for integration on map in a multiserver environment
Consolidated Timeline - Camera video isn't in sync with the consolidated timeline when another panel contains a carousel
Tracker - BasePortInternal setting ignored when starting up
DataAccessService - BasePortInternal setting ignored when starting up
Symphony does not switch Thin Client panels to carousels
Client Switches from a fixed camera view to a carousel when the panel is maximized
Addressed a deadlock issue reported by a customer improving reliability under specefic system conditions
A rule change requires a killall to reflect in client
Medium CyberSecurityInformation Disclosure within Response
Watch windows in the client are not translating Event Type names

Description
It's possible to keep video footage for a greater number of days than metadata for a camera after cleaning
Canceling adding a user requires a confirmation (even after not inputting any information)
Server config (General Settings page) asks to save changes when there aren't any
New Player - Loading saved floating view doesn't reuse existing floating view window
Server originally registered offline, goes online and loses licenses
New Map Icons don't reflect camera state
