## Release 3.0.3 (January 2020)

---

### Fixes

Issue ID	Description
VMS-1875	The Symphony Mobile Application for Android does not stop responding when you stream video from the Symphony Server 6.x.

## Release 3.0.2 (January 2020)

---

### New features

Issue ID	Description
VMS-1790	Audio from cameras
VMS-1863	The Symphony Mobile Application for Android can play audio from cameras for live and historical video. While viewing video, you can mute and unmute the audio.

### Fixes

Issue ID	Description
VMS-1857	The Symphony Mobile Application for Android does not stop responding when you hit the back button while viewing video at the highest resolution.
VMS-1858	The Symphony Mobile Application for Android does not open the choose server page after you resume video that you have paused for an extended time.
VMS-1860	You can clear notifications from the Symphony Mobile Application for Android from the notification bar.
VMS-1861	The alarm icon for the Symphony Mobile Application for Android appears as expected.

## Release 3.0.1 (November 2019)

---

### Improvements

Issue ID	Description
VMS-1773	The Symphony Mobile Application for Android supports 64-bit devices.
VMS-1777	The Symphony Mobile Application for Android includes an option to display the highest resolution for video. This option introduces support for video up to 4K resolution.
VMS-1812	The Symphony Mobile Application for Android polls for alarms when it is in an idle state on Android 6.0 and later.

### Fixes

Issue ID	Description
VMS-1711	Alarm notifications from the Symphony Server work as expected on Android devices.
VMS-1718	The Symphony Mobile Application for Android stops properly without the Android devices displaying warning messages about battery use.
VMS-1813	The Symphony Mobile Application for Android does not stop responding when playing 4K video.

## Release 3.0 (November 2018)

---

### Improvements

Issue ID	Description
VMS-498	You can control which video decorations to display in the Symphony Mobile Application. You can also disable them. You must enable decorations on the Symphony Server. This feature works with Symphony Server 7.0.x and later.
VMS-1726	The Symphony Mobile Application for Android uses Senstar branding.
